

Adapt to the new normal with the hybrid workplace

Powered by Aruba ESP

An enormous shift has happened to the place we call work.

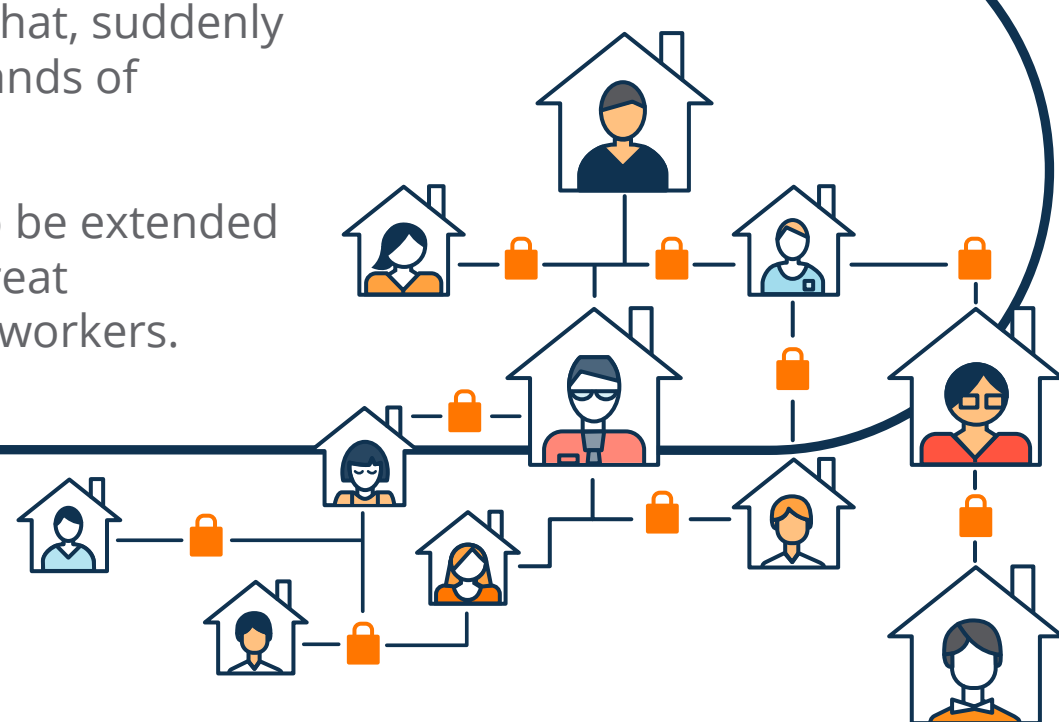

74%

of organizations reported moderate or significant impact to employees due to the pandemic.

Going to the office every day was once the norm. The global pandemic changed all of that, suddenly forcing companies to support thousands of employees working from home.

The workplace experience needed to be extended in a secure way, while maintaining great application performance for remote workers.

IT faces new challenges as the meaning of "workplace" is redefined.

74%

intend to shift some employees to remote work permanently.

70%

of employees that used to work in the office, now exclusively work from home.

In the hybrid workplace, your employees can move seamlessly and securely back and forth from the home and the office.

70%

of workers expect to be productive from anywhere (at the office, at home, or while traveling).

Secure connectivity from home

Aruba ESP enables IT to extend the enterprise to the home office, at scale

Zero Touch Provisioning supplies easy home wireless connectivity

Automatically deployed, fully integrated VPN & role-based policies

Network management centrally from the cloud, with full visibility and troubleshooting from anywhere

Return to the location-aware office

Ensure employee wellness and safety, using technology to encourage social distancing

Contact tracing using Wi-Fi and Bluetooth can help minimize virus spread among employees, customers, and visitors

Location services assess user density and proximity, so you can manage the capacity of your workplace by limiting access when you've reached full capacity, or modifying floorplans when traffic patterns become inadvertently risky

The hybrid workplace starts with the network you have.
